TECHNICAL SKILLS

- AI Agents
- Automations
- JavaScript
- Node.js
- Core PHP
- SQL
- React.js
- Chakra UI
- MongoDB
- Supabase
- REST APIs
- Responsive Web Design
- Git & GitHub

• PROFILE SUMMARY

Full stack developer with a primary focus on AI Agents and Automation — designing autonomous agents that handle customer support and complex business operations, and building automation pipelines that connect business tools and social media platforms to cut out repetitive manual work and reduce operating costs. Also fluent across the JavaScript ecosystem, building production-grade interfaces and APIs with React.js, Node.js, MongoDB, SQL, Supabase, and core PHP. 1 year and 2 months of professional remote experience delivering client-facing websites and portals end-to-end. BSCS graduate seeking a role centered on AI Agents, Automation, and full stack development.

• EDUCATION

◦ Intermediate (FSc / Pre-Medical)

Punjab Group of Colleges (PGC)

◦ BS Computer Science (BSCS)

Barani Institute of Sciences, PMAS Arid Agriculture University

• WORK EXPERIENCE

◦ DeviceBee Technologies

Remote — Dubai-based company · 1 year and 2 months

- Delivered multiple client-facing websites and business portals end-to-end for international clients, using React.js and Chakra UI to build clean, production-ready interfaces.
- Shipped frontend work across four different industries — legal services, luxury yacht rentals, hospitality, and talent marketplaces — adapting each build to its client's real operational workflow.
- Converted design requirements into responsive, reusable React components, keeping UI/UX consistent across every project.
- Connected frontend applications to backend APIs and MongoDB/SQL databases to power dynamic, real-time content.
- Built and maintained REST APIs and server-side logic in Node.js, driving dynamic features across every client-facing portal.
- Owned Git and GitHub workflows across the full project portfolio, keeping version control and collaboration consistent for the team.

• KEY PROJECTS

◦ Legal Platform & Business Portal

- Web platform connecting users, businesses, and law firms to post legal issues and hire lawyers, with secure direct chat, a business portal for managing legal matters, and cross-platform access (web, iOS, Android).

◦ Nirvana Website & Portal

- React-based booking platform for a luxury yacht and boat rental company in Abu Dhabi, featuring tiered memberships, real-time boat bookings, PayPal/card payments, and bilingual (English/Arabic) support.

◦ Omniyat Food Ordering App

- Cross-platform digital menu and ordering solution (Vue 3 + Capacitor) for Omniyat's sales gallery, letting guests scan a QR code to browse menus, place orders, call a teaboy, and track order history.

◦ Nahham Web

- Bilingual (Arabic/English) talent marketplace platform connecting companies with creative talents across the UAE, with OTP-based authentication, Stripe payment integration, and end-to-end project/offer management.
